MAKES THE WORLD SMALLER IN SECURE ENVIRONMENTS

Our mission is to ensure our customers the best competitive terms in secure environments.

We find the right supplier and conduct a "Factory Audit" in order to ensure the best possible quality.

- | We ensure that the price is right in relation to the market prices.
- | We verify existing certifications or carry out certification of the supplier.
- | We prepare QC reports on all products.
- | We follow the logistics from presentation to delivery.
- | Being member of the BSCI (social conduct) – as Abson Industry is already
- | They sign and follow our strict quality demands

With Abson China LTD we have a committed and competent staff, who is in daily contact with all our producers to support them in all aspects of European standards concerning:

- | Quality management
- | SPC management
- | Quality inspection in all levels of the production and according to the signed processes

PRODUCT AND QUALITY GUARANTEE

All batches are inspected from the float glass production until the packed container is ready for shipment by Abson China LTD. The inspection is done respecting strict quality demands and according to following standards:

- | Tempered glass, according to **EN 12150** – meaning according to a given AQL, we make physical tests of the glass on a certain batch, break and analyze it, before it can pass for shipment.
- | Bubbles / scratches / dirt etc. according to **EN572-2:2004** meaning according to a given AQL, we make visual inspection on a special illuminating table/environment of the glass on a certain batch.

| Additional quality standards and inspections such as:

- | Broken edge
- | Crystal line
- | Broken corner
- | Dirt / marks
- | Damage on hole edges
- | CE Marks
- | Packaging
- | Shipping marks
- | Pallet construction
- | All dimensions – with tolerances according to standards

All standards/requirements will be custom-made by a PA (product approval) so it fits exactly to your demands.
